### „Evolution instead of revolution“

We think this declaration is most fitting for our new product line because behind it is the advancement of one of our most popular series: „light“ becomes „x-light“.

As the needs and wishes of our clients are inevitably subject to change over the course of time we as a company must reflect that change but also keep in mind our demands on ourselves on how to best please our customers.

Abeba has always strived to offer innovative solutions for the individual needs of our clients. We live this philosophy day by day and this is what has enabled us to offer such a wide and unique assortment of shoes.

An evolution is known to bring adaptation to changing circumstances.

This is why the „x“ in our latest product group stands for:

- Enhanced resistance to slipping of sole (SRC – the best slip resistance, for maximum protection)
- Lightweight, responsive cushioning (for even more wearing comfort – especially on long, hard working days)
- And an optimised fit (to satisfy the individual feet)

The new profile of the „x-light“ walking sole made from flexible mono-PU is certified with SRC slip resistance for optimal protection on ceramic tiles and steel floors.

Combined with the new replaceable „Active Comfort“ foot-bed our shoes are real all-rounders with ultimate cushioning effect.

But of course we as Abeba do not neglect our core strengths: We have integrated the best lining materials which are additionally refined with silver ions. This antibacterial lining offers you built-in protection through the catalytic properties of the silver. Bacteria are reduced and odours inhibited – for the most advanced walking experience ever.

„Even more joy in walking“ is the promise we intend to keep with our new „x-light“.

Thank you for your confidence.

# ACTIVE COMFORT INSOLE

With the newly innovated footbed „Active Comfort“ we step up our game because we at Abeba do not only look at the shoes when evolving our „light“ series – far from it!

There's more to this light insole than meets the eye.

The Abeba „Active Comfort“ insole offers additional support to the metatarsal area of the foot by its new technically mature form.

The breathable insole has antibacterial properties and is antistatic at the same time. It absorbs the fluids and transports them outside and thus keeps the feet dry and odour-less. Paired with the reset effect on the walking sole which dampens impact from the outside while walking we have reached an impeccable cushioning effect which alleviates pain from the feet even after a long day at work.

- X** Antistatic / ESD-compatible
- X** Odour-impeding activated carbon
- X** Cushioning effect
- X** Breathability
- X** Moisture absorption
- X** Moisture release to the outside
- X** Antibacterial
- X** Light
